

1/21/99

RADAC meeting

10:00 – 10:30

I. Comments ~ short meeting, several members absent

- David - Should the raw data monitor code be done in Visual C++, or Borland C++?
- Kennedy demo now scheduled for 2/10 at headquarters.
- FAA conference in Washington 2/9-2/10 on the commercialization of space operations.
- ULDB Requirements and Functional Specifications can be found at:
<http://www.wff.nasa.gov/~code584/ULDBControlCenter/documentation.html>
- We have come to a point where we need a charter from Mike Fillis to implement anything.

II. For next meeting (possibly 1/28/99, else 2/4/99) continue with:

- Tom – continue to work on contacts
- Jim – Mission Analysis
- Rodney/Mark – porting effort
- Terry – write testing ideas & FAQ's, things from experience with original RADAC
- Debbie – CM software research: ClearCase, SourceSafe 6.0, Razor, and StarTeam. Looking for the following capabilities: Version Control, Parallel Development, Workspace Management, Build Management, Process Control and Platforms.
- All – let Debbie know of any other CM packages you are aware of &/or other capabilities to look into. Present any testing ideas and concerns to Terry to be incorporated into his list.
